What should you do if a condom breaks?

- You should go to the emergency of any hospital and ask for a preventive treatment against HIV (AIDS). It's called « traitement post-exposition ». It can prevent HIV infection if it's taken within 48 hours.
- If you're not taking any contraceptive, you should go in any pharmacy and ask for emergency contraception. It's called "pillule du lendemain" or "NORLEVO". It can prevent pregnancy if taken within 72 hours. It cost around 7 €.

The sooner, the better !
